Subject: Additivity report and RTC document for discussion tomorrow
Attachments: DA WP revisions + Response to Comments 3-26-19 (JS).docx; Additivity Report 3-26-19 (JS).docx

Thanks Jeff.

All,

At this point, I believe that we are only missing responses and DA Rpt changes in Ch 3 (some) and 4 (all).
I would like to discuss the changes that Jeff made in Ch 3. I would also like to discuss specific changes in Chs 6 and 5.

Also, I transferred the responses to the comments on Chapter 6 that Jason addressed into Ch 6 of the DA RPT; these are all in Track Changes. To discuss on Friday, Jason left 1 comment open for tech panel discussion. It is captured next:

Ex. 5 Deliberative Process (DP)

Technical Panel Response

Ask the workgroup on the 3/29/19 call.

GR: I think we can pushback on this, but am open to other opinions. While I think that this might be useful research and an interesting independent manuscript, it is outside the scope of this chapter that focuses on the uses of NAM data in dose addition.

I also addressed specific comments in Chapter 5. I call your attention to the following two comments.

Chapter 5

Bussard Comment 9

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

+++

GR Things to not forget:

The IRIS cite is to the online database, so change the year to 2019.
